

Verification of conformity

This is to verify EnerKey system, audited on 21st of August 2018, is applicable as a service platform when managing energy use and energy efficiency in real estates and it may enable companies to fulfill the criteria of the standard ISO 50001 Energy Management Systems requirements:

- Develop a policy for more efficient use of energy
- Fix targets and objectives to meet the policy
- Use data to better understand and make decisions concerning energy use and consumption
- Data collection and analyzing
- Review the effectiveness of the policy
- Continually improve energy management.

What is mentioned above about the qualifications of EnerKey system regarding ISO 50001 may also be applied to the standard ISO 14001, Environmental Management Systems, when applied to the management of energy use.

For the sake of clarity the company shall in order to achieve certification based on ISO 50001 apply that separately from an accredited certification body.
